Residential New Construction - Basement Finish	Currently our Basement is one room, with plywood structural floors, insulation, and not much else. One wall which houses the door to the crawl space has been drywalled, but the remaining walls are what we plan on finishing. We would also like to build a soffit around a beam and drywall/finish the ceiling. Currently the heater/AC, water heater, washing/drying machines are along one wall, where we plan to build closets to store these items in the future, as of right now I think we are just planning on framing and drywalling the existing main walls. For those future plans however, the laundry, water heater and furnace will be behind one wall with two doors to access them, and next to those will be an additional storage closet. We plan on adding one more closet next to the staircase where the underside of other stairs leading upstairs are currently visible. We need to move the light switches to the two current light sources, as it currently would be inside a future closet. We plan on moving the switch to the other side of the same wall, where the stairs are. We hope to add one outlet near the window, but other than that are not adding any electrical. No plumbing will be moved or added.	VALERIE STRATFORD	20693 E JEFFERSON PL, AURORA, CO 800136615	BLD-2020-03472	8/26/2020	\$ 6,500.00	CHERRY CREEK SCHOOL DISTRICT
