Residential Remodel-Renovation - Gas Line	GAS PRESSURE TEST We capped off all existing gas appliances besides the living room fire place, it is a secured insert unit with no access to the gas line so we had to shut the floor valve off to pressure test. We pressure tested the system up to 20 psi and found the guage slowly dropping, we soap tested all exposed gas fittings and found (2) leaks. We tightened the main gas line trunk drip leg and stopped that leak, the other leak was on a 3/4" gas valve which requires taking apart the main trunk and cutting the black iron pipe to replace the section.
