ELECTRICAL: New power, and lighting per drawings. PLUMBING: Relocate existing for new water closet, tub and linen closet. EXTERIOR WORK: None per application. ACA Description of Work: "The master bathroom at our home was remodeled in 2012 and we've never been happy with the overall quality. The primary purpose of this remodel is to replace the fixtures, tub, shower, tile, and cabinets with better quality selections. Secondly, we will be slightly altering the layout to yield more elbow-room around the toilet, more storage space in the closet, and a better overall visual appearance. Key Differences as marked 1. Utility closet widened to reclaim wasted space. Toilet moves to location originally held by that utility closet. 2. New, wider utility closet built where toilet was originally positioned. 3. Original glass shower door widened and replaced with glass wall. 4. Short wall between the bathtub and shower removed, making way for new glass door entry to shower. 5. Smaller bathtub re-oriented with plumbing fixtures on the outside wall. 6. Shower plumbing fixtures re-located to outside wall. 7. New shower pan will be pre-formed Wedi pan."
