

Classes of Fences and Walls

- **Class 1 – Masonry:** Any fence or wall composed of stone, brick, concrete, gypsum, hollow clay tile, concrete block, pre-cast concrete units or tile or similar building units or materials or combination of these materials laid up unit by unit and set in mortar, or pre-cast and set in place.
- **Class 2 – Ornamental Iron:** Any wrought iron or metal fence, of primarily open design, consisting of straight or curved metal bars or pieces, including metal vertical picket fences.
- **Class 3 – Chain Link:** A fence of primarily open design consisting of an interlocking pattern of wire or metal of at least one-eighth inch in diameter supported by vertical and/or horizontal bars or posts of at least one and one half inches in diameter.
- **Class 4 – Wood Picket:** A fence of open design (more than 50 percent open), as viewed from outside the fence. This type of fence includes fences with vertical slats of wood or other material, with or without pointed ends, as the primary fencing material (i.e., “picket fence”), as well as fences with horizontal wooden bars or rails as the primary fencing material (i.e., “split-rail fence”).
- **Class 5 – Solid:** Privacy fencing typically constructed of wood or vinyl that is less than 50 percent open as viewed from outside the fence, whether the pickets or slats are oriented vertically or horizontally.
- **Class 6 – Hedge:** A wall consisting of living bushes, trees, plants or plant materials, but not including grass or weeds.

EXAMPLE SITE PLAN:

Please use notation or color to distinguish between new fence and existing fence, as well as where height and/or style will vary. Please provide the linear feet for each fencing type
